

Produktbeschreibung

Used stackable stacking racks / tire racks for the storage of passenger car tires. Equipped with an open bottom construction suitable for a maximum of 4 tires with a size of up to 18 inches. This versatile construction is painted green. The tire rack is high enough on all sides to be picked up with a pallet truck or forklift truck and therefore easy to move. The two blue lacquered side walls are removable, which saves you considerable space when not in use.

The racks are extremely suitable in environments such as the automotive industry, garages, workshops, warehouses or distribution halls. Because the height of the stacking racks is 970 mm, you can store tires very high. All this for a more effective warehouse!

Attention! The legs of these tire racks are partly ground out, but are still excellent and safe to stack.
